RE: The benefits of Spray Polyurethane Foam roofing combined with PV @ St. Francis Square Cooperative

To Dr. Julia Gress

Abril Roofing, Martinez, CA is a second generation, Hispanic American owned spray polyurethane foam roof contractor in the Bay Area. They have re-roofed using Spray Polyurethane Foam over 1000 Eichler homes or Bay Area single family residences. Abril has an impressive roofing installation record with over 900 Bay Area single family references for superior workmanship, impeccable safety record, and valuable energy saving performance.

Approximately 5 years ago, Rick Abril, co-owner, lead a SPF recover project as sub-contractor for Occidental Power @ St. Francis Square Cooperative, western addition neighborhood in San Francisco. They field applied spray foam on top the existing roof substrate and sealed around the Occidental solar photovoltaic stanchions servicing 299 apartments in 12 three story buildings.

"St. Francis Square is an owner-occupied residential complex located in the Japantown/Western Addition neighborhood of SF."

Occidental Power has...."more than 20 years ago, our solar thermal installation was considered one of the largest in San Francisco. The solar thermal installation can also be seen in this photo. They are the long panels tilted higher. We continue to maintain both installations today!"
